

Working with json files using python

Python Scripting for Automation

(Automate your repetitive tasks with python scripting)

JSON:

- **JSON (JavaScript Object Notation)** is a popular data format used for representing structured data.
- It's common to transmit and receive data between a server and web application in JSON format.

Python	JSON Equivalent
<code>dict</code>	object
<code>list</code> , <code>tuple</code>	array
<code>str</code>	string
<code>int</code> , <code>float</code> , <code>int</code>	number
<code>True</code>	true
<code>False</code>	false
<code>None</code>	null

Thank you
